Overview

Moodle™ LMS is a popular open source Learning Management System. It is widely used for online learning by universities, schools, governments, and corporations worldwide. With a modular design and a library of over 1,000 plugins and extensions, as well as a well-documented API, it can be adapted to a limitless variety of online learning uses. It can interface with cloud services like Dropbox and supports notifications and private messaging.

### Complete your site registration

We'd love to stay in touch and provide you with important things for your Moodle site! By registering:

- You can subscribe to receive notifications of new Moodle releases, security alerts and other important news.
- You can access and activate mobile push notifications from your Moodle site through our free Moodle app.
- You are contributing to our Moodle statistics of the worldwide community, which help us improve Moodle and our community sites.
- If you wish, your site can be included in the list of registered Moodle sites in your country.
